Subject: stockade block

It seems that every time we turn around the government is taking away or charging more to use the land WE own and manage it for the purpose of a select few. The over grazing of leased land is evident all over the state and it cost the tax payer to pay the bill for the administration of such projects. We as the hunting community are being regulated and controlled more every day. We the working class can not pay these prices for leased property hunting. Only the wealthy seem to be trying to regulate the very land the people own. Many areas are land locked from the public by adjacent private owners who use these areas as their own hunting and recreation areas. Seems to me that we are not allowed to have a voice to or given the information until we get to an area and read the fine print or be fined for something we assumed we could use. This must stop!
