Subject: Stockade Block Management Plan Comments

I was so disappointed to find that I missed the hearing last night on the Stockade Block proposal. Myself and many of my friends and family would have attended. had we have known. It would be a shame if the tax payers/hunters of Oregon are restricted from accessing the land mentioned in the proposal. Public land should never be restricted from recreational use with out a voting a process by the public. It is the public's tax dollars that pay for the land management and support that land. To set up this area under a lease only would restrict the majority of the public from ever having access to it. Most of us, including myself could never afford a lease. Please reconsider this proposal.
