This seems just like another effort of the liberals in Portland trying to dictate to the rest of the state, what they think we ought to do for their conveniences or to fit their ideological views...

the state setting up wind turbines is a good idea...

leasing state own land for hunting and trapping to the 'highest bidder' is just another chapter in the forced elitism that the liberal left wants to establish in this country....

so now you are trying to make it where a hunter could be arrested for poaching the "kings" of governor's deer??

this plan is both foolish and stupid...
